#### INDEPENDENT AUDITORS' REPORT

To the Supervisory Board and Shareholders of MF banka a.d., Banja Luka

We have audited the accompanying financial statements (page 2 to 48) of MF banka a.d., Banja Luka (hereinafter the "Bank"), which comprise the statement of financial position as of December 31, 2013 and the related statement of profit and loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Bank's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's Internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion,

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of MF banka a.d., Banja Luka as at December 31, 2013, and its financial performance and its cash flows for the year then ended in accordance with internalional Financial Reporting Standards.

#### **BANK'S FOUNDATION AND SUSINESS POLICY** 1.

MF Banka a.d., Banja Luka (hereinafter the "Bank") was established on June 12, 2007 and named IEFK Banka a.d., Banja Luka.

in the process of the Bank's registration, all requirements defined by the regulatory authorities with respect to the principal banking activities were fulfilled. In accordance with its Decision numbered 03-231-11/2007 of May 11, 2007, the Republic of Srpska Banking Agency (lhe \*BARS" or "Agency") issued an operating license to the Bank, and pursuant to Decision numbered 03-657-4/2007 of July 12, 2007, the Agency issued to the Bank a license to conduct international payment transactions.

At the Shareholder Assembly meeting held on April 6, 2010, the previous owners of the Bank enacted a Decision to sell 100% of the Bank's equity (Note 21), whereafter an Agreement on the Purchase and Sale of Capital was signed on July 8, 2010 based on which the Bank's major shareholder became MKD Mikrofin d.o.o., Banja Luka, and as of that date this entity also assumed the management and control over the Bank.

Based on the decision enacted by the new owner of the Bank and the decision of the competent court in Banja Luka as of November 26, 2010, the Bank changed its name into MF Banka a.d., Banja Luka.

In the Republic of Srpska, the Bank is licensed to perform banking activities that include payment transfers, credit and deposit operations in the country and abroad, and as in accordance with the Republic of Srpska banking legislation, the Bank is to operate based upon the principles of liquidity, solvency and profitability.

The Bank is headquartered in Banja Luka, at number 22 Vase Pelagića Street. At December 31, 2013, the Bank had a central office in Banja Luka and branch offices Borik and Centar in Banja Luka and branch offices in Laktaši, Gradiška, Derventa, Brčko, Bijeljina, Doboj, Prljedor, East Sarajevo, Zvomik, Novi Grad, Teslić, Prnjavor and Pale.

As of December 31, 2013, the Bank had 138 employees (December 31, 2012; 111 employees).

#### BASIS OF PREPARATION AND PRESENTATION OF THE FINANCIAL STATEMENTS AND 2, ACCOUNTING CONVENTION

#### 2.1. Statement of Compliance

The accompanying financial statements are the annual stand-alone financial statements of the Bank, prepared in accordance with International Financial Reporting Standards (IFRS).

#### Basis of Measurement and Preparation of the Financial Statements 2.2.

The financial statements of the Bank have been prepared on the historical cost principle as further explained in the accounting policies hereunder.

#### **Functional and Presentation Currency** 2.3.

The Bank's financial statements are stated in thousands of Convertible Marks (BAM), BAM being the functional and official presentation currency in the Republic of Srpska and Bosnia and Herzegovina.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

# 2. BASIS OF PREPARATION AND PRESENTATION OF THE FINANCIAL STATEMENTS AND ACCOUNTING CONVENTION (Continued)

# 2.4. Application and impact of the New and Revised International Financial Reporting Standards (IFRS)

Standards and Interpretations Effective in the Current Period

The following amendments to the existing standards Issued by the International Accounting Standards Board and interpretations Issued by the International Financial Reporting Interpretations Committee (IFRIC) are effective for the current period:

- IFRS 10 "Unconsolidated Financial Statements" (effective for annual periods beginning on or after January 1, 2013);
- IFRS 11 "Joint Arrangements" (effective for annual periods beginning on or after January 1, 2013);
- IFRS 12 "Disclosures of Involvement with Other Entities" (effective for annual periods beginning on or after January 1, 2013);
- IFRS 13 "Fair Value Measurement" (effective for annual periods beginning on or after January 1, 2013);
- IAS 27 (revised in 2011) "Separate Financial Statements" (effective for annual periods beginning on or after January 1, 2013);
- IAS 28 (revised in 2011) "Investments in Associates and Joint Ventures" (effective for annual periods beginning on or after January 1, 2013);
- Amendments to IFRS 1 "First-time Adoption of International Financial Reporting Standards" Government Loans (effective for annual periods beginning on or after January 1, 2013);
- Amendments to IFRS 7 "Financial Instruments: Disclosures" Offsetting Financial Assets and Financial Liabilities (effective for annual periods beginning on or after January 1, 2013);
- Amendments to IFRS 10, IFRS 11 and IFRS 12 "Unconsolidated Financial Statements, Joint Arrangements and Disclosures of Involvement with Other Entities: Transition Guidance" (effective for annual periods beginning on or after January 1, 2013);
- Amendments to IAS 1 "Presentation of Financial Statements" Presentation of items of Other Comprehensive Income (effective for annual periods beginning on or after July 1, 2012);
- Amendments to IAS 19 "Employee Senefits" (effective for annual periods beginning on or after January 1, 2013);
- Amendments to various standards and interpretations "Improvements to IFRSs (2012)" resulting
  from the annual improvement project of IFRS published on May 17, 2012 (IFRS 1, IAS 1, IAS 16,
  IAS 32, IAS 34), primarily with a view to removing inconsistencies and clarifying wording (most
  amendments are to be applied for annual periods beginning on or after 1 January 2013); and
- IFRIC 20 "Stripping Costs In the Production Phase of a Surface Mine" (effective for annual periods beginning on or after January 1, 2013).

The adoption of these amendments to the existing standards and interpretations has not led to significant changes in the Bank's accounting policies, with the exception of certain additions to disclosures as required in accordance with the new IAS 1.

Standards and Interpretations in Issue not yet in Effect

At the date of issuance of these financial statements the following standards, revisions and interpretations were in issue but not yet effective:

- IFRS 9 (revised in 2010)"Financial Instruments" (effective for annual periods beginning on or after January 1, 2015);
- IFRS 14 "Regulatory Deferral Accounts" (effective for annual periods beginning on or after January 1, 2016);
- Amendments to IFRS 9 "Financial Instruments" and IFRS 7 "Financial Instruments: Disclosures" –
   Mandatory Effective Date and Transition Disclosures (effective for annual periods beginning
   on or after January 1, 2015);
- Amendments to IFRS 10, IFRS 12 and IAS 27 Exemption from Consolidation of Subsidiarles under IFRS 10 'Unconsolidated Financial Statements' (effective for annual periods beginning on or after January 1, 2014);

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

# 2. BASIS OF PREPARATION AND PRESENTATION OF THE FINANCIAL STATEMENTS AND ACCOUNTING CONVENTION (Continued)

# 2.4. Application and Impact of the New and Revised International Financial Reporting Standards (IFRS) (Continued)

Standards and Interpretations in Issue not yet in Effect (Continued)

- Amendments to IAS 32 "Financial Instruments: Presentation" Offsetting Financial Assets and Financial Liabilities (effective for annual periods beginning on or after January 1, 2014);
- Amendments to IAS 36 "Impairment of Assets" Disclosure of Recoverable Amount for Non-financial assets (effective for annual periods beginning on or after January 1, 2014);
- Amendments to IAS 39 "Financial Instruments:" Recognillon and Measurement Novation of Derivatives and Continuation of Hedge Accounting (effective for annual periods beginning on or after January 1, 2014);
- Amendments resulting from Annual Improvements 2010-2012 Cycle issued in December 2013 (IFRS 2, IFRS 3, IFRS 8, IFRS 13, IAS 16, IAS 24 and IAS 38) with a view to removing inconsistencies and clarifying wording (effective for annual periods beginning on or after July 1, 2014).
- Amendments resulting from Annual Improvements 2011-2013 Cycle Issued In December 2013 (IFRS 1, IFRS 3, IFRS 13 and IAS 40) with a view to removing inconsistencies and clarifying wording (effective for annual periods beginning on or after July 1, 2014); and
- IFRIC 21 "Levies" (effective for annual periods beginning on or efter January 1, 2014).

The Bank's management has elected not to adopt these standards, revisions and interpretations in advance of their effective dates. The management anticipates that the adoption of these standards, revisions and interpretations will have no material impact on the financial statements of the Bank in the period of initial application.

# 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

## 3.1. Income and Expense Recognition

Interest income and expenses for all interest-bearing financial instruments, except for financial instruments classified as available for sale or carried at fair value through profit and loss, are stated at fair value of assets received or paid, and are presented as Interest income and expenses, and fee and commission income expenses in the statement of profit and loss and other comprehensive income.

Interest income is deferred and recognized using the effective interest method, which represents the rate that exactly discounts (reduces) the estimated future cash inflows over the expected life of financial instruments to the net carrying amount of such assets upon initial recognition.

Loan origination fees are deferred and amortized over the loan repayment period by applying the effective interest method and are presented within interest income.

Interest income is recognized exclusively based on performing loans and other investments where there are no problems in collection, i.e., based on loans and investments that do not represent bad (impaired) assets. Calculations of interest receivables from non-performing loans and other investments, i.e. loans and investments that represent bad (impaired) assets as there are problems in collection thereof, are recorded within off-balance sheet items and recognized as income only if collected.

### 3.2. Foreign Exchange Translation

Transactions denominated in foreign currencies are translated into BAM at the official exchange rates prevailing at the date of each transaction. Assets and liabilities denominated in foreign currencies are translated into BAM at the statement of financial position date by applying the official rates of exchange in effect on that date. Confingent liabilities denominated in foreign currencies are translated into BAM at the official exchange rates prevailing at the statement of financial position date. Foreign exchange gains or losses arising upon translation are credited or charged to the statement of comprehensive income.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### 3. SUMMARY OF SIGNIFICANT ACCUNTING POLICIES (Continued)

#### 3.3. Equipment and Intangible Assets

Items of equipment and intangible assets are recorded at cost net of any accumulated depreciation and amortization, and any accumulated impairment losses. Cost represents the prices billed by suppliers, increased by all acquisition-related costs and all costs incurred in bringing the assets to the location and condition necessary for their intended use.

Depreciation and amortization are calculated on a straight-line basis at the following prescribed annual rates in order to write off the assets over their estimated useful lives:

	Depreciation and Amortization Rate	Useful Life (Years)
Computer equipment	25%	4
Automobiles	15.5%	6.5
Telephone switchboards	7%-10%	10 <b>– 14.3</b>
Furniture	10%-12.5%	8 - 10
Inlangible assets	20%	5

The Bank's management believes that the amortization and depreciation rates that have been applied realistically reflect the expected patterns of future consumption of economic benefits from equipment and intangible assets.

The depreciation and amortization of assets commence when the assets are available for use and placed on the location and in condition necessary for them to operate in a manner intended by the Bank's management.

If the useful life of an item of equipment is under a year, It is treated as tools or fixtures and is fully written-off once placed into use.

#### 3.4. Impairment of Assets

At each statement of financial position date, the Bank's management reviews the carrying amounts of the Bank's tangibles in order to determine the indications of impairment loss. If there is any indication that such assets have been impaired, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss. In cases where it is impossible to assess the recoverable amount of an individual asset, the Bank assesses the recoverable value of the cash generaling unit to which the asset belongs.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use. For the purpose of assessing value in use, estimated future cash flows are discounted to the present value by applying the discount rate prior to taxation reflecting the present market estimate of time value of cash and risks specifically related to the asset in question.

the estimated recoverable amount of an asset (or cash generating unit) is below its carrying value, the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. An impairment loss is immediately recognized as an expense of the current period.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

As of December 31, 2013, in the assessment of the Bank's management, there were no indications that the value of equipment and intangible assets had suffered impairment.

Year Ended December 31, 2013

(All emounts expressed in thousands of BAM, unless otherwise stated.)

#### 3. SUMMARY OF SIGNIFICANT ACOUNTING POLICIES (Continued)

#### 3.5. Financial Assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis, i.e. requiring delivery of assets within the time frame established by regulation or convention in the marketplace, and are initially measured at fair value including transaction costs. Financial assets are classified into the following specified categories: loans and receivables and financial assets available for sale. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

#### Effective Interest Method

The effective interest method is a method of calculating the amortized cost of financial assets and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, or, where appropriate, a shorter period.

Income is recognized on an effective Interest basis for debt instruments other than those financial assets classified as at fair value through profit and loss.

#### Financial Assets Available for Sale

Available-for-sale financial assets comprise Investments in equity instruments of enterprises and other legal entities that are listed in an active market stated at fair value at the end of each reporting period. Investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost. Gains and tosses arising from the changes in the fair value directly affect the equity, i.e. the investment revaluation reserves, except for impairment losses, interest calculated using the effective rate method and foreign exchange gains or losses on monetary assets, which are recognized in profit and loss. When the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss.

The fair value of available-for-sale monetary financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate prevailing at the statement of financial position date. The foreign exchange gains and losses that are recognized in profit or loss and other comprehensive income are determined based on the amortized cost of the monetary asset. Other foreign exchange gains and losses are recognized within equity.

#### Loans and Receivables

Loans and other receivables with fixed or determinable payments that are not quoted in an active markel can be classified as loans and receivables. Loans and receivables are measured at amortized cost using the effective interest method, less any impairment. Interest income is recognized by applying the effective interest rate.

For the purpose of determining amortized cost, i.e. fair value of loans in accordance with IAS/IFRS, the Bank uses contractually agreed effective interest rate that adjusts the net present value of future cash flows to the nominal value of the loan approved, net of principal repaid.

Loans are contractually agreed with a variable interest rate according to the Bank's business policy. The Bank receives as collaterals payment orders, guarantees, bills of exchange, mortgages assigned over property and pledge liens over movables, deposits and the like.

#### Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, monetary assets held with the Central Bank and balances on foreign currency accounts held with domestic and foreign banks and other deposits maturing within less than three months form the placement date.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### SUMMARY OF SIGNIFICANT ACQUINTING POLICIES (Continued)

#### 3.5. Financial Assets (Continued)

Impairment of Financial Assets

Financial assets, other than those at fair value through profit and loss, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For equity investments not quoted in an active market and classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, including redeemable securities classified as assets available for sale, and finance lease receivables, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as a default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organization.

For certain calegories of financial assets, such as trade receivables from loans approved, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Bank's past experience of collecting payments, an increase in the number of delayed payments past the maturity dates, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impakment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss and other comprehensive income.

Except for securities available for sale, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

In respect of AFS equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized within equity.

#### Derecognition of Financial Assets

The Bank derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Bank neither transfers nor retains substantially all the risks and rewards of ownership and retains control over a financial asset, it continues recognize such an asset.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### SUMMARY OF SIGNIFICANT ACCUNTING POLICIES (Continued)

#### 3.6. Financial Liabilities

Financial liabilities comprise long-term and short-term trade payables and other liabilities.

Financial liabilities are initially recognized at the amounts received. Subsequent to the initial recognition, financial liabilities are measured at the initially recognized amounts net of principal repayment and increased by capitalized interest less any write-off granted by the creditor. Financial liabilities are stated at amortized cost using the effective interest rate, interest accrued on financial liabilities is charged to finance of the respective period and presented within other current liabilities.

The Bank derecognizes financial liabilities when the Bank's obligations are discharged, cancelled or they have expired.

#### 3.7. Taxes and Contributions

#### Current Income Tax

Current income tax relates to the amount payable in accordance with the income Tax Law. Current income tax is payable at the rate of 10% applied to the tax base determined in the taxa balance and reported in the annual corporate income tax return, being the amount of profit before taxation net of income and expense adjustment effects pursuant to the tax regulations of the Republic of Srpska.

The tax regulations in the Republic of Srpska allow for the reduction of the tax base for the amounts used in capital expenditures, for restoration of own manufacturing activity and for the amounts of the payroll taxes and contributions for over 30 newly employed staff members at the end of the financial year.

The tax regulations in the Republic of Srpska do not envisage that any tax losses of the current period be used to recover taxes paid within a specific carryback period. However, current period tax losses stated in tax return may be used to reduce or eliminate taxes to be paid in future periods but only for duration of no longer than five ensuing years.

#### Deferred Income Taxes

Deferred Income tax is determined using the balance sheet liability method, for temporary differences arising between the tax bases of assets and liabilities components, and their carrying values in the consolidated financial statements. The currently enacted tax rates at the statement of financial position date are used to determine the deferred income tax amount. Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for deductible temporary differences, and the tax effects of income tax losses and credits available for carry forward, to the extent that it is probable that future taxable profit will be available against which deferred tax assets may be utilized.

#### Indirect Taxes and Contributions

Indirect taxes and contributions include payroll contributions charged to the employer, properly taxes, and various other taxes and contributions, included in other operating expenses.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stelled.)

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 3.8. Employee Benefits

In accordance with regulatory requirements, the Bank is obligated to pay contributions to government social security funds and pension funds that are calculated by applying specific, legally prescribed percentages. These obligations involve the payment of taxes and contributions on behalf of employees, by the employer, in an amount calculated in accordance with the statutory regulations. The Bank is also legally obligated to withhold contributions from gross salaries to employees, and on behalf of its employees, to transfer the withheld portions directly to the applicable government funds. These taxes and contributions payable on behalf of the employees and employer are charged as expenses in the period in which they arise.

In accordance with the requirements of IAS 19 "Employee Benefits," the Bank performs the actuarial valuation of provisions so as to determine the present value of accumulated employee retirement benefits. Upon retirement, the Bank's employees become antitled to retirement benefits in an amount equaling three monthly salaries earned by the vesting employee.

Expenses of retirement benefits are determined using the projected unit credit method for actuarial valuation as of the balance sheet date. Accordingly, the Bank engaged an Independent certified actuary to calculate the present value of accumulated employee entitlements to retirement benefits as of December 31, 2013 on behalf of the Bank. In the calculation of the present value of accumulated employee entitlements to retirement benefits, the certified actuary used the following assumptions: projected salary growth of 2.9% annually, years of service required for retirement – 40 years for men and 35 years for women, projected employee turnover based on data on historical employee turnover in the prior period, officially published mortality rates in the region in the prior period, as well as other requirements necessary to exercise rights to a retirement benefit. In the opinion of the management, the amounts presented in the financial statements reflect the real value which is most reliable and useful for the needs of the financial reporting under the current circumstances.

#### 3.9 Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

#### The Bank as a Lessor

Lease income from operating leases (rentals) is recognized in income on a straight-line basis over the lease term. Initial direct costs incurred by lessors in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized as an expense over the lease term on the same basis as the lease income.

#### The Bank as a Lessee

Lease payments under an operating tease are recognized as an expense on a straight-line basis over the lease term unless another systematic basis is more representative of the time pattern of the user's benefit. Contingent fees arising from operating leases are recognized as expenses in the periods in which they arise.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

#### 4. SUMMARY OF SIGNIFICANT ACCOUNTING ESTIMATES

The presentation of the financial statements requires the Bank's management to make best estimates and reasonable assumptions that influence the assets and liabilities amounts, as well as the disclosure of contingent liabilities and receivables as of the date of preparation of the financial statements, and the income and expenses arising during the accounting period. These estimations and assumptions are based on information available to the management, as of the date of preparation of the financial statements. However, actual future amounts may depart from the estimates.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### 4. SUMMARY OF SIGNIFICANT ACCOUNTING ESTIMATES (Continued)

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Basic assumptions relating to the future events and other significant sources of uncertainties in rendering an estimate as of the statement of financial position date, which bears the risk that may lead to significant restatement of the net book value of assets and liabilities in the ensuing financial year, were as follows:

Estimated Useful Life of Equipment and Intengible Assets

The estimate of useful life of equipment and intangible assets is founded on the historical experience with similar assets, as well as foreseen technical advancement and changes in economic and industrial factors. The adequacy of the estimated remaining useful life of fixed assets is analyzed annually, or in cases where there are indications of significant changes in certain assumptions.

#### Impairment of Assets

At each statement of financial position date, the Bank's management reviews the carrying amounts of the Bank's assets for the Indications of impairment loss. If there is any indication that such assets have been impaired, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. If the recoverable amount of an asset is estimated to be less than its carrying value, the carrying amount of the asset is reduced to its recoverable amount.

#### Allowance for Impalment of Receivables

At each reporting date the bank assesses whether there is objective evidence that Individual financial assets or groups of financial assets have suffered impairment. The Bank calculates the Impairment of its receivables in accordance with IAS 39 "Financial Instruments: Recognition and Measurement" and IAS 37 "Provisions, Contingent Assets and Contingent Liabilities" as well as the regulations of the Banking Agency of the Republic of Srpska. The management assesses that allowance for Impairment of receivables in addition to the amount already recognized in the financial statements is not necessary.

At each month end, the Bank calculates impairment losses contingent on defaults and irrecoverability and provisions thereof by applying the following two methodologies:

- 1) methodology for calculation of the aforesaid provisions based on IAS 39 "Financial Instruments: Recognition and Measurement," used for internal and external reporting purposes of the Bank, and
- methodology for calculation of the aforesaid provisions prescribed by the BARS and used exclusively for reporting to the regulator (BARS).

According to IAS 39 "Financial Instruments: Recognition and Measurement," the Bank reviews the loan portfolio in order to determine allowance for impairment and provisions on a monthly basis. Information that may indicate the losses on loans include customer creditworthiness, irregularity and defaults in settling liabilities, market and economic conditions on a local level conditioning defaults in settling liabilities and the like. Management's assessments regarding the impairment in financial instruments within the loan portfolio included in the Bank's portfolio by way of assessing future cash flows are based on actual historical losses incurred on financial assets with similar causes of impairment.

The Bank calculates impairment for all customers that are over 90 days in default with payments. The Bank recognizes impairment losses up to the amount of recoverable value of loans/investments measured at amortized cost.

Impairment loss is the difference between its present value (amortized cost) and its recoverable value. The recoverable value is the present value of expected cash inflows from assets, increased by the expected future inflows from collaterals, net of present value of collection charges.

Impairment losses are charged to the statement of profit and loss and other comprehensive income. The amounts of impairment losses on loans/ investments are reflected on the allowance account.

#### NOTES TO THE FINANCIAL STATEMENTS Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

# 4. SUMMARY OF SIGNIFICANT ACCOUNTING ESTIMATES (Continued)

Allowance for impairment of Receivables (Continued)

Where an impairment loss subsequently reverses due to events that emerged after its initial recognition, the reversal is credited to statement of profit and loss and other comprehensive income, but the amount of reversal may not exceed the amount of amortized cost that would have been determined and recognized as at the impairment reversal date had no impairment loss been previously recognized.

The Bank first assesses whether there is objective evidence of individual-level impairment for an individually significant asset or of group-tevel impairment for financial assets that are not individually significant. If the Bank determines that there is no objective evidence of individual-level impairment of a financial asset, whether it be significant or not, such an asset is included into a group of assets with similar credit risk characteristics and assessed for impairment collectively, i.e. on a group level.

According to the Bank's internal methodology for impairment allowance calculation, Individually significant exposure is considered to be each exposure in excess of BAM 10 thousand. Other exposures, i.e. other bank's receivables are subject to individual assessment for impairment due to the specificity of each individual receivable. The procedure of impairment assessment is performed for all receivables defined as materially significant by the internally adopted methodology. Materially significant amounts are amounts above:

- 2.6% of the individual Bank's receivable due from a private individual debtor, but not below BAM 50, and
- 2.5% of the Individual Bank's receivable due from a tegal entity debtor, but not below BAM 150.

The Bank assesses whether a loan is individually significant for Individually significant exposures (in excess of BAM 10 thousand) in default, i.e. those that are over 90 days past due. Based on the defined criteria the Risk Management Department finds loans eligible for Individual assessment. After the review of such loans, the Risk Management Department proposes loans eligible for calculation of Individual-level impairment allowance, and the remaining loans are referred to the portfolio-level assessment of impairment and calculation of impairment allowance. The proposals made by the Risk Management Department are verified by the bank's Managing Board. For each individual calculation of impairment allowance a form named "Analysis of Impairment Evidence" is created and enclosed with the credit file of the borrower.

Individual impairment allowance is calculated as the difference between the total exposure and the sum of discounted cash flows (from regular repayment and collateral forectosure) for the specific borrower/exposure

The Bank has defined the minimum amount of impairment allowance for individually assessed exposures without quality collateral as follows:

- for exposures with repayment from 90 to 180 days past due, impairment allowance amounts to minimum 20% of the exposure, and
- for exposures with repayment over 180 days past due, impairment allowance amounts to minimum 55% of the exposure.

All toans and advances that are not individually impaired are subject to group or portfolio-level assessment and calculation of impairment. Loans/borrowers are classified into homogenous groups with identical or similar characteristics and subgroups depending on the number of days the repayment is in arrears. For all exposures included in the portfolio-level calculation of impairment allowance the exposure is divided into the secured and unsecured portion. The unsecured portion of loans is calculated as the difference between the total exposure and the recognized value of collateral. The Bank's internal methodology defines the weights for recognized value of collaterals, depending on the collateral type.

Portfolio-level Impairment allowance is calculated as follows: an impairment allowance percentage defined for the specific group/subgroup of loans is applied to the unsecured portion of the exposure and multiplied with the average loss confirmation period (LCP).

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

## 4. SUMMARY OF SIGNIFICANT ACCOUNTING ESTIMATES (Continued)

Allowance for Impairment of Receivables (Continued)

In accordance with BARS Decision on Classification of Balanca Sheet assets and Off-balance Sheet Items according to Recoverability, the Bank is obligated to classify loans, advances and other balance sheet and off-balance sheet exposures into categories A, B, C, D and E in accordance with the estimate of their recoverability. Classification is performed based on the regularity in liability settlement on the part of the borrowers, financial position of the borrowers and collaterals. The estimated amount of provisions for potential losses is calculated by applying percentages prescribed by the aforecited BARS Decision.

The difference between allowance impairment amounts in accordance with IAS 39, determined in the aforedescribed manner and the estimated amount of provisions for potential losses per loans classified into categories pursuant to the BARS Decision represents the amount of shortfall reserves as per regulatory requirement, which is stated as an item deductible from capital.

	Total	34,748	13,774

Pursuant to the Decision of the Central Bank of Bosnia and Herzegovina regarding reserve requirements, the Bank has to calculate and maintain an obligatory reserve of the average balance of the Bank's total deposits (which serve as a basis for computing the obligatory reserve) according to the average balance found at the end of work days of ten calendar days preceding the projection. The obligatory reserve is calculated as the sum of 10% of the total deposits maturing within a year and 7% with over one year maturities. The basis for computing the obligatory reserve includes calculated interest, fees and commissions due.

This reserve is available for liquidity purposes. The Central Bank of Bosnia and Herzegovina accrues and pays interest at the rate ranging from 0.004% to 0.128% to the amount of obligatory reserve, while the amount of resources exceeding the calculated obligatory reserve accrues interest at the rate determined as the average of interest rates realized over the same period by the Central Bank on the market based on its up-to-one month deposits (0.05% to 0.165%).

During 2013, the Bank maintained the obligatory reserve amount within the legally prescribed limits.

#### LOANS TO CUSTOMERS

	December 31, 2013	December 31, 2012
Short-term loans in BAM – up to 1 year Long-term loans in BAM – over 1 year Current portion of long-term loans in BAM	21,868 63,847 <u>26,500</u> 112,2 <u>15</u>	20,356 45,755 19,498 85,608
Less: Allowance for impairment of loans to customers	(3,139)	(2,610)
Total	109,076	82,998

The major portion of *short-term* loans in BAM was placed with domestic corporate and retail customers at annual interest rates ranging from 8% to15.5%, whereas the minimum and maximum annual interest rates applied to such loans equaled 3% and 22%, respectively. The annual interest rate of 3% was approved to the customers with a 100% earmarked term deposit placed with the Bank as collateral, while the interest rates higher than 16.6% refer to the short-term loans assumed from MKD Mikrofin d.o.o. Banja Luka. Short-term loans were securitized with bills of exchange, sureties and pledge liens assigned over movables and mortgages assigned over property.

The largest portion of loans extended to retail customers relate to transaction account overdrafts and consumer loans, while the largest portion of the loans approved to corporate customers represent toans for working capital and liquidity maintenance.

Most *long-term* loans in BAM were extended to corporate and retail customers at annual Interest rates ranging from 8% to 14% for periods of maximum 10 years, with respective minimum and maximum interest rates of 3.32% and 18% annually. The minimum interest rate of 3.32% was approved to the customers with a 100% earmarked term deposit placed with the Bank as collateral, while the interest rates higher than 14% refer to the short-term loans assumed from MKD Mikrofin d.o.o. Banja Luka. The aforesaid loans were securitized mostly with high quality collaterals such as mortgages and pledge liens assigned over movables. In 2013 the Bank approved loans from the funds of the Investment and Development Bank of the Republic of Srpska ("IDB RS") for periods of over 10 and up to 20 years in accordance with the rules of IDB RS.

The largest portion of long-term loans approved to retail customers included general consumer loans, housing loans for purchase and construction and adaptation of homes, while the corporate long-term loans were intended for financing capital expenditures and investments and working capital.

The geographical concentration of loans approved to customers as included in the Bank's loan portfolio mostly comprises customers domiciled in the Republic of Srpska.

Loans Purchased from MKD Mikrofin d.o.o., Banja Luka

in the first half of FY 2013, the Bank entered into two Agreements on Assignment/Assumption of Receivables for a Consideration whereby it assumed 371 loans from the related party MKD Mikrofin d.o.o., Banja Luke. The consideration at which the aforesaid loan portfolio was transferred equals the amount of net receivables as of the transaction date measured in accordance with the requirements of IAS 39 ""Financial Instruments: Recognition and Measurement" applying the internal methodology of MKD Mikrofin d.o.o., Banja Luka, so that from these transactions the Bank earned/incurred neither positive nor negative effects to be included in the statement of profit and loss and other comprehensive income.

The net carrying value of the receivables assumed per the aforesaid Agreements in 2013 totaled BAM 3,686 thousand. The summary of effects of the aforesaid loan portfolio purchase transactions in 2012 and 2013 is provided in the following table:

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

The borrowed funds are intended for financing loans to customers for the following purposes: purchase of property, plant and equipment, financing working capital, investments, startup micro, small and medium-sized enterprises and entrepreneurs.

Loan Agreement Covenants

Pursuant to the loan agreements entered into with creditors, the Bank is obligated to comply with certain procedures and accounting records that adequately reflect the Bank's operations in accordance with IAS and IFRS and certain financial covenants.

As of December 31, 2013, the Bank was in full compliance with all individual covenants from all the relevant loan agreements.

#### 19. SUBORDINATED DEBT

	December 31, 2013	December 31, 2012
KfW, Germany	3,912_	
Total:	3,912	

On December 18, 2013, the Bank and KfW Germany executed an agreement on subordinated debt amounting to EUR 2 million for a period of 5 years, with one-off repayment at interest rate of 7% annually intended for strengthening the Bank's total capital.

As of December 31, 2013, the Bank included the subordinated loan in the calculation of its net capital upon previously obtained approval from BARS. After the expiry of the 5-year period, the Bank must not repay the subordinated debt if such repayment would result in decrease in the Bank's capital below the prescribed level. The Bank is obligated to obtain the approval from BARS prior to commencement of the subordinated loan repayment.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

As of December 31, 2013, the Bank was involved in 163 legal suits filed against debtors in attempts to collect matured receivables. The total value of claims sought in these proceedings aggregated to BAM 3,095 (housand, Provisions for potential losses in this respect were formed in the amount of BAM 814 thousand.

As of December 31, 2013, there was a single legal sult involving the Bank as a defendant. Given the nature of the lawsuit, the bank's management estimates that the Bank will incur no material losses upon the outcome thereof.

#### c) Regulatory Compliance

The Bank is obligated to reconcile the volume of its business operations with the legally prescribed adequacy and performance ratios, i.e. to maintain the scope and structure of its assets in compliance with the accounting standards and regulations of the Republic of Srpska, established and controlled by the Banking Agency of the Republic of Srpska.

As of December 31, 2013, the Bank was in compliance with the accounting standards and regulations of the Republic of Srpska, established and controlled by the BARS per all the prescribed ratios.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### 25. TAXATION RISKS

The Republic of Srpska and Bosnia and Herzegovina currently have several tax laws in effect, as imposed by various governmental agencies. The applicable taxes include: a turnover tax, corporate tax, and payroll (social) taxes, among others. Following their introduction, the regulations governing these taxes were not enforced for substantial periods of time; in contrast to similar legislation in more developed market economies. Moreover, the regulations defining the implementation of these taxes are often unclear or non-existent. Hence, few precedents with regard to tax issues have been established in the Republic of Srpska. Often, contrary opinions pertaining to tegal interpretations exist both among, and within, governmental ministries and organizations, thusly creating uncertainties and areas of legal contention. Tax returns, together with other legal compliance matters (e.g., customs and currency control matters) are subject to the review and investigation by a number of authorities that are legally enabled to impose extremely severe fines, penalties and interest charges.

Year Ended December 31, 2013

(All emounts expressed in thousands of BAM, unless otherwise stated.)

#### TAXATION RISKS (Continued) 25.

The interpretation of lax legislation by tax authorities as applied to the transactions and activity of the Bank may not coincide with that of the management. As a result, transactions may be challenged by tax authorities and the Bank may be assessed additional taxes, penalties and interest, which can be significant. In accordance with the Law on Tax Authority of the Republic of Srpska, expiration period of the tax liability is five years. This practically means that tax authorities could determine payment of outstanding liabilities in the period of five years from the origination of the liability. The afore-described situation creates tax risks in the Republic of Srpska and Bosnia and Herzegovina that are substantially more significant than those typically existing in countries with more developed tax systems.

In August 2013, the Tax Administration of the Republic of Srpska conducted inspection of the Bank's calculation and payment of direct taxes for the period from August 2008 to august 2013. The Inspection revealed no Irregularities in the Bank's calculation and payment of direct taxes over the period under review.

#### CURRENT ECONOMIC SITUATION AND ITS IMPACT ON THE BANK 26.

During 2013, the Bank's operations were under the impact of the global economic and financial crisis. However, in the course of 2013, the Bank did not face any significant liquidity problems despite the significant lending activity.

So far, the ongoing financial crisis has had a limited impact on the financial position and performance of the Bank, mainly due to the Internal risk management policies and regulatory restrictions. In a timely manner the Bank took a number of measures to prevent risk deterioration such as:

Revision of loan approval policies and procedures, credit risk assessment and risk management policies and procedures;

Creation of a new division within the Bank in charge of loan restructuring;

Approval of loan rescheduling in order to adjust repayment to the actual and realistic customers' sources of financing;

Revaluation of collaterals upon loan reapproval and restructuring/rescheduling; and

Ensuring the structure of sources of assets that enables restructuring of the existing exposures to the customers.

The Bank closely monitors the credit, liquidity, interest rate and foreign exchange risks on an ongoing basis. The management expects that the Bank's liquidity will be satisfactory in the forthcoming period as

The deteriorating economic situation in the country will probably impact the position of certain industries and the ability of certain customers to discharge their liabilities per borrowings obtained from the Bank. This may consequently influence the amount of the Bank's provisions for impairment losses in 2014 and other areas that require estimates to be made by management, including the valuation of collaterals and of securities. The 2013 finencial statements contain significant estimates with respect to impairment charges and asset and collateral valuation. The key priority of the Bank in 2014 will be attention to the management of the financial portfolio adjusting to the changing economic environment.

#### EVENTS AFTER THE REPORTING PERIOD 27.

As of March 11 and 12, 2014, the Bank executed an agreement on assignment/assumption of a portion of receivables for a consideration, whereby the Bank purchased 2,827 loan accounts from the related Party MKD Mikrofin d.o.o., Banja Luka, which transferred all rights and liabilities arising from the a foresaid to the Bank. The sales price of the portfolio sold was equal to the amount of net receivables as at the transaction date, measured in accordance with the requirements of IAS 39 - "Financial Instruments: recognition and Measurement\*

The total value of the aforedescribed transaction of a loan portfolio portion purchase by the bank was as follows:

	Loans to Customers	Interest Accrued	Total_
Receivables Less: Allowance for impairment of receivables	10,354 (212)	86 (1)	10,441 (214)
	10,142	85	10,227

#### NOTES TO THE FINANCIAL STATEMENTS Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### FINANCIAL INSTRUMENTS (Continued)

#### 29.1. Financial Risk Management (Continued)

The Managing Board (Continued)

The Managing Board is also responsible for implementation of the defined risk management strategy and capital management strategy as well as the Bank's risk management policies.

The Managing Board oversees the work of all lower management levels within the Bank and controls the implementation of the adopted policies and procedures. The Managing Board monitors the trends and analyzes risk management at least quarterly and regularly informs the supervisory Board thereof. In instances certain activities are not defined by the strategy or policy, the Bank's managing Board is obligated to notify the supervisory Board thereof.

#### The Credit Committee

Within the defined crediting policy of the Bank, the Bank's Credit Committee makes decisions on loans from BAM 150 thousand to BAM 500 thousand of exposure to a single entity and loans tolating between BAM 200 thousand to BAM 750 thousand of total exposure to a single entity or a group of related entities. Decisions on loans below the aforesaid amounts falls under remit of Credit Committees of branches or Heads of Branches.

#### The Risk Management Department

The Risk Management Department plays key role in identification, measurement, assessment and management of risks assumed by the Bank In the regular course of business. The Risk Management Department is under obligation to express opinions in writing on all loan requests in excess of BAM 150 thousand. An opinion of the Risk Management Department is an integral part of the toan proposal, i.e. loan case to be discussed by the Credit Committee.

As a member of the Bank's Credit Committee, the Manager of the Risk Management Department can exercise its veto power upon deciding on loans discussed by the Bank's Credit Committee. The Risk Management Department expresses an opinion on each new risk-generating credit product as well as other risk-generating areas.

#### The Asset and Liability Management Committee (ALCO)

The principal function of the Bank's Asset and Liability Management Committee (ALCO) is to identify, measure, and manage risks inherent in the Bank's balance and off-balance sheet Items, primarily liquidity and interest rate risks by setting adequate risk limits and measures for elimination of adverse risk impact on profitability.

#### Loan Management Committee

The principal roles of the Loan Management Committee include monthly monitoring of the loan portfolio quality at the branch level, considering individual loan files with exposures of over BAM 150 thousand (mostly COR and PUB customers) and preparing proposals, conclusions and decisions. The competence of this Committee encompasses granting approvals of departures from the defined collection procedures.

#### Liquidity Commission

The Bank's Liquidity Commission, comprised of three members appointed by the Bank's Supervisory Board – a member of the Managing Board, the Manager of the Treasury and Transactions Department and Manager of the Risk Management Department, has meetings at least on a monthly basis. The Commission monitors and assesses daily liquidity based on the liquidity plan as of the certain date, submitted by the Treasury and Transactions Department on a daily basis to the members of the Commission and Managing Board.

The Commission analyzes the liquidity plan and its realization on a monthly basis, proposes measures and defines tasks for liquidity maintenance so that the Bank can avoid the risk of adverse effects on its financial performance due to its inability to discharge it current liabilities as these fall due.

#### NOTES TO THE FINANCIAL STATEMENTS Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### 29. FINANCIAL INSTRUMENTS (Continued)

# 29.1. Financial Risk Management (Continued)

The Treasury and Transactions Department

The Bank's Treasury and Transactions Department manages current liquidity through the following activities;

Planning cash inflows and outflows on a daily basis;

- Monitoring transactions and cash balances on the accounts of reserves held with the Central Bank, balances on the accounts held with domestic and foreign correspondent banks and balances of cash on hand in foreign and local currencies (Bank's vault) and cash offices of the Bank.
- Obtaining the shortfall amounts of funds or investing surplus liquid funds in the financial markets;
- Monitoring large Individual inflows/outflows of funds of depositors and loan disbursements in order to maintain the foreign currency position, maturity match and timely settlement of all liabilities matured;
- Analyzing the structure and maturities of deposits, undertaking re-contracting of maturities for deposits matured;
- Maintaining and allocating the obligatory legal reserve as the minimum amount of funds set aside on the account held with the Central Bank;
- Preparing daily, monthly and semi-annually liquidity plans as the method for estimating future liquidity;
- Reporting on liquidity movements both internally and externally.

The most significant risks to which the Bank is exposed are credit risk, market risk, liquidity risk and operational risk.

#### 29.2. Credit Risk

The Bank assumes credit risk which relates to potential negative effects on the financial result of the Bank contingent on the failure of debtors to meet their liabilities towards the Bank. Credit risk is the most significant risk for the Bank's business operations, and the Bank manages its risk exposure being aware of its importance. The credit risk exposure occurs primarily based on crediting activities i.e. in loan origination activity. Credit risk is also present in off-balance sheet instruments such as guarantees and undrawn loan facilities.

Credit risk represents the risk of negative effects on the Bank's financial result and capital as a result of the customer's inability to settle its matured liabilities to the Bank. Credit risk entails:

- Default risk the risk of loss that may arise if a debtor fails to settle liabilities toward the Bank;
- Downgrade risk the risk of loss that may arise if a risk level of a debtor is downgraded (deterioration of in the customer credit rating) on the line items of assets that are recorded in the credit portfolio;
- Risk of change in the value of assets the risk of loss that may arise on items of assets that are recorded in the credit portfolio in the event of a decline in their market value compared to the price at which assets were acquired;
- Counterparty exposure risks risks that can arise from the Bank's exposure toward a single
  individual, a group of related parties or to entitles that are related with the Bank.

The Bank manages credit risk by implementing the crediting strategy focused on entrepreneurs and SME and risk dispersion.

The Bank manages credit risk by approving standardized credit products in accordance with its crediting policy. Those products and their basic characteristics in terms of amount, maturity, interest rate, fee and obligatory collateral are defined in the bank's Credit Product Catalogue. The Risk Management Department is involved in definition of credit products and their evaluation from the aspect of risk, Decision-making levels defined by the Rules of Procedure for Credit Committees, are competent for decision making in instances of standard loan approval under standard terms, whereas any departure from the defined standards requires higher level decision making.

Year Ended December 31, 2013

(All emounts expressed in thousands of BAM, unless otherwise stated.)

### 29. FINANCIAL INSTRUMENTS (Continued)

### 29.2. Credit Risk (Continued)

The Bank's Credit Manual clearly defines the manner of processing credit products, documentation required for certain market segments, steps of the crediting process and organizational units and individual operators responsible for the implementation thereof. The aforesaid document prescribes all the forms used in loan processing and monitoring and the manner and forms for analyses of the credit worthiness of borrowers depending on the segment they belong to (COR and PUB, SME and Retail segments). The bank approves loans in accordance with the defined procedure for loan approval based on the assessed credit worthiness of the borrowers and collaterals. The analysis of the borrower creditworthiness must be presented in the document named "Analysis," which includes the loan proposal as the basis for making a decision on loan approval. Such decisions are made based on the defined limits for individual exposures and total exposures per single entity or a group of related entities. There five levels of authority within the Bank for loan approval, the highest of which is the Bank's Supervisory Board and the lowest personal responsibility of the Branch Manager. Processing of loan requests for SME and Retail segments is decentralized and performed by the Bank's branches. Processing of loan requests from the receipt of up to the loan disbursement is performed through the application module adjusted to the requirements of the Front Office.

In April 2013, COR and PUB division was formed where processing of loan requests of corporate and public sector customers is centralized and loans are monitored and collected. This Division also supports documentary operations for SME.

The Instructions for Collection and Management of Non-Performing Loans (NPL) define the manner of monitoring the existing loans and competences and responsibilities for performing collection activities. The aforesaid instructions define the daily and monthly monitoring of collection within certain steps of NPL management are performed. In order to ensure quality, systematic and orderly management of loan portfolio in default, the Bank's internal procedures prescribe the following two documents: "Irregular Repayment File" and "Collection Strategies." The "Irregular Repayment File" represents a report providing a summary of activities already undertaken and performed in respect of loans with repayment over 30 days past due and is maintained until the loan repayment is settled in full. Loan Officers are obligated to maintain the Irregular repayment files and chronologically record all activities undertaken in order to collect the receivables. The maintenance of this form is supported by the software within the module used by the Front Office. "Collection Strategies" is a report presenting a dynamic overview of activities that will be undertaken in order to collect receivables, i.e. the agreed upon collection strategy.

Since the end of 2010, the Bank has had the Risk Management Department within its organization. This Department measures and controls risks and since November 2011, it has performed risk assessment and evaluation of the borrower creditworthiness and given opinions presented to the Credit Committee upon deciding on loan approval.

In changes to its organizational structure conducted in 2011, the 8ank relleved the Loan Officers of loan accounting, loan disbursement and other loan administration tasks and formed a separate department for these jobs, thereby reducing the risk.

Impairment Losses and Provisioning Policy

The Bank estimates the risk of potential losses due to deterioration of the borrower credit rating. Credit risk represents the risk of the borrowers' mability to discharge their fiabilities when due, whether there be little probability of borrowers settling the liabilities from their primary sources or the repayment be over 90 days past due.

Impaired loans are those loans where objective evidence of impairment has been determined. Objective evidence of impairment includes events causing measurable decrease in the estimated future cash flows.

*Individually impaired assets* are those assets which were assessed for impairment on an individual level and for which the assessed impairment losses have been recognized. The amount of impairment loss is determined as the difference between the carrying value and the present value of the future cash flows.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### 29. FINANCIAL INSTRUMENTS (Continued)

#### 29.2. Credit Risk (Continued)

Impairment Losses and Provisioning Policy (Continued)

The calculated amount of the impairment of balance sheet assets is charged to expenses and credited to the impairment allowance of those assets, while the calculated amount of the probable loss per off-balance sheet assets is charged to expenses and credited to the provisions for potential losses per off-balance sheet items.

Group-level or portfolio-level assessment for Impatment is performed for loans that are not individually significant. For the purpose of this type of impairment assessment, loans are classified into groups homogenous from the credit risk aspect in accordance with the bank's internal methodology for calculation of the impairment allowance.

Expected future cash flows for homogenous loan groups are determined based on the available historical data, mostly data on default in liability settlement, and cash flows that will certainly result from collateral foreclosure are also taken into account.

#### Collaterals

In accordance with the standard principles of crediting operations, the Bank requires collaterals for loan securitization to cover the risk of the borrower Inability to meet the contractual obligations. The Bank most commonly uses the following collaterals:

- Bills of exchange,
- Collection authorizations,
- Statement of distraint (injunction),
- co-debtor,
- co-sureties,
- mortgages assigned over property,
- předge liens assigned over movables,
- deposits/savings deposits,
- insurance policies.

The Bank reserves the right to demand any other type of collateral it deems necessary.

Non-Performing Loans (NPL)

Non-performing loans (NPL) are loans with repayment over 90 days past due and materially significant default. According to the categorization, those are category C, D and E loans, Loans from category B and less than 90 days past due ate not considered to be NPL but are assets for special watch.

The Bank does not have an internal customer credit rating system. The Bank classifies the customers in accordance with its internal methodology for calculating impairment allowance according to the number of days in arrears and in accordance with the BARS Decision on the Minimum Standards for Credit Risk Management and Asset Classification. Pursuant to the aforecited BARS Decision, all borrowers are classified into 5 categories; A,B,C,D and E.

NPL management for SME and Retail customers is centralized within the Division for Loan Restructuring. The Division was formed in April 2013 in order to ensure higher quality NPL management for SME and Retail segment borrowers.

NPL management for COR and PUB customers is also centralized and under remit of the COR and PUB Division. This Division is competent for rescheduling and restructuring COR and PUB loans but the opinion expressed by the Risk management Department is mandatory. When this Division has attempted and falled at all possibilities of collection, it proposes making a decision on instigation of legal proceedings to the Bank's Loan Management Committee/Credit Committee.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### FINANCIAL INSTRUMENTS (Continued) 29. .

#### 29.2. Credit Risk (Continued)

Non-Performing Loans (NPL)(Continued)

Instructions for Collection and management of NPL explicitly prescribes the activities of assumption, monitoring and collection of NPL for all market segments. A SME and Retail segment loan is assumed by the Division for Loan Restructuring when either of the following two conditions is met:

The borrower's total liabilities natures per loan exceed or are equal to 4 repayment installments or there was no repayment for the previous two months and the total debt amount is lower than the amount of 3 repayment installments; or

The borrower failed to settle the liabilities due per approved account overdraft/revolving loan within

30 days from the maturity of the loan portion used.

The borrowers meeting one or the other of the above listed criteria are transferred under the remit of the Division for Loan Restructuring if it is possible to enable further regular debt servicing by the borrower through loan rescheduling/restructuring. Borrowers are transferred from the Front Office to the Loan Restructuring Division upon Front Office creating a monthly list of borrowers where, on the last day of the previous month, conditions were met for this transfer. The transfer of borrowers from the Front Office to the Loan Restructuring Division is made at the group of related entities level. In exceptional cases, the Division for Loan Restructuring may assume only a certain member of a group, which must be explained in detail, documented and approved by the Bank's competent body. If there are no possibilities for resuming debt servicing on the part of the borrower, such a borrower is not transferred to the Loan Restructuring Division but to the Legal Department Instead, where legal proceedings are instigated.

After the transfer to the Loan Restructuring Division, the Loan Restructuring Officer becomes competent for a specific borrower/case until the final collection thereof or its transfer to the Legal Department. The Loan Restructuring Officer is obligated to propose to the Credit Committee the loan restructuring/rescheduling plan as soon as possible.

Restructured loan is a toan that has been refinanced, rescheduled or otherwise converted, i.e. a loan where, due to the borrower's deteriorated situation and ability to repay loan or inability to repay it under the initially defined terms, the previously contractually defined terms are subsequently changed to facilitate the borrower's debt servicing.

Loan Restructuring Officers propose approval of measures and incentives for the borrowar's recovery such as: extension of repayment periods for the existing debts, rescheduling repayment liabilities, approving new loans to the main borrowers or other creditworthy co-debtors, decrease of the debt amounts through write-off of receivables, approval of additional grace periods, approval of different ways of repayment to suit the borrowers' ability to repay loans (balloon payment, unequal repayment installments) etc.

Loan Officers or Loan Restructuring Officers may at any time, upon estimating that all possibilities of NPL collection have been attempts and failed, propose instigation of legal proceedings against the borrowers. Decision on Instigation of legal proceedings against the borrowers are made by the competent Credit Committee and such cases are transferred under the remit of the Legal Department after the respective loan agreements are terminated.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

# 29. FINANCIAL INSTRUMENTS (Continued)

## 29.2. Credit Risk (Continued)

Non-Performing Loans (NPL)(Continued)

Loan Restructuring Officers are obligated to request the transfer to the legal Department upon fulfillment of the following criteria:

- the borrowers total debt matured equals or exceeds the amount of 7 loan repayment installments; and
- the sum of the borrowers payments received in the previous 3 months is lower than a single repayment installment amount.

The Front Office Loan Officers may also propose rescheduling loans as a strategy (addressing collection issues) even before criteria are met for the loan transfer to the Loan Restructuring Division. This particularly relates to the restructuring of retail loans fulfilling the criteria from the BARS Decision on Temporary Measures for Rescheduling Loans of Retail and Corporate Borrowers. These are not NPL loans being rescheduled, but loans up to 90 days past due.

The Bank has set up a centralized and automated system for delivery of reminders to borrowers, which is in charge of administrative clerks for the first and second reminder, while delivery of the reminder before lawsuit filing, i.e. before loan agreement termination, is within the scope of competence of Loan Officers or Loan Restructuring Officers. After the transfer to the Legal Department, this department assumes competence over monitoring of the transferred loans/borrowers until full collection or write-off debt.

On a weekly basis the Sank's Managing Board reviews the loan portfolio over 30 days past due per segment, particularly SME segment, and undertakes activities to maintain the portion of the loan portfolio over 30 days past due within the projected scale.

#### Credit Risk-Related Risks

The Bank issues guarantees to its customers whereupon it has contingent liabilities to make the payment in favor of third parties. In this manner the Bank is exposed to risks similar and related to credit risk, which may be overcome by applying the same control processes and procedures. Monitoring and collection procedures applied to these exposures are identical to those applied to loans.

### Collaterals and Other Forms of Securitization

The Bank demand security instruments for all types of loans. The amount and type of the security instrument demanded depends on the market segment a specific borrower belongs to and the type of credit product approves as well as the assessed credit risk for each individual borrower.

The assessment and fair value of collateral are based on the value thereof upon loan approval. In accordance with its business policy and internal procedures, the Bank determines the required fair value of the collateral as well as the manner and time of its revaluation.

The management monitors the market value of collaterals and demands additional security instruments upon reassessment of the impairment allowance adequacy.

	Year Ended December 2013 201		
Loans securitized with earmarked deposits	1,243	2.672	
Loans securitized with mortgages	44,312	18,678	
Loans securitized with other collaterals		64,252	
Total:	112,215	85,608	

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

## 29. FINANCIAL INSTRUMENTS (Continued)

#### 29.2. Credit Risk (Continued)

29,2,1. Concentration Risk

In order to improve credit risk management and control, the Bank has set up adequate and prudent limits relative to the Bank's capital in accordance with the BARS Decision on the Minimum Standards for Concentration Risk Management, as follows: total credit risk exposure of the Bank toward a single entity or a group of related entities must not exceed 40% of the Bank's core capital, this being the amount of the largest total credit risk exposure (LTCRE). The Bank may attain the LTCRE toward a single entity or a group of related entities only if the following structure and restrictions thereof are ensured:

- The Bank's credit risk exposure toward a single entity or a group of related entities unsecured by collateral must not exceed 5% of the Bank's core capital;
- The Bank's credit risk exposure toward a single entity or a group of related entities ranging from over 5% up to 25% of the Bank's core capital must be secured by collateral;
- The Bank's credit risk exposure toward a single entity or a group of related entities ranging from over 25% up to LTCRE must be secured by the quality marketable pledge lien the value of which, as determined by reliable and stable market prices, exceeds the amount of the exposure;
- The Bank's total credit risk exposure per contingent off-balance sheet liabilities toward a single entity
  or a group of related entities except for performance bonds, must not exceed 20% of the Bank's core
  capital.

The sum of the Bank's large exposures (Bank's large exposure = each total credit risk exposure toward a single entity or a group of related entitles in excess of 15% of the Bank's core capital) must not be above 300% of the Bank's core capital.

The sum of the Bank's large exposures per conlingent off-balance sheet liabilities toward a single entity or a group of related entitles except for performance bonds, must not exceed 300% of the 8ank's core capital.

The Bank's internal policies and procedures define the concentration limits per single entity or a group of related entities and Bank's related parties.

The Risk Management Department monitors and measures and, in collaboration with the Accounting, Controlling and Business Support Department, reports on the risks of exposure toward a single entity or a group of related entities and Bank's related parties.

As of December 31, 2013, the Bank was in full compliance with all the limits regarding risk concentration prescribed by BARS and agreed with creditors.

### Risk Concentration per Borrower

As of December 31, 2013, the largest exposure to a single entity borrower, before considering collaterals, amounted to 8AM 3,469 thousand or 2.1% of the total credit risk exposure and 17.32% of the Bank's core capital (December 31, 2012; BAM 4,465 thousand).

As of December 31, 2013, the largest exposure to a group of related entities was the exposure to Agroimpex Group, which, before considering collaterals, amounted to BAM 3,155 thousand. At the same time, the total credit risk exposure to the Bank's related parties amounted to BAM 2,504 thousand.

### Credit Risk Concentration per Geographic Areas

During 2013, the Bank's toan portfolio was concentrated on the territory of the Republic of Srpska, i.e. the City of Banja Luka. In the amount of BAM 38 million, with significant growth in territorial concentration recorded in the towns of Derventa, East and Prijedor. In 2012 the credit risk was also concentrated on the territory of the Republic of Srpska, i.e. the City of Banja Luka.

Year Ended December 31, 2013

### 29.2.1. Concentration Risk (Continued)

## Credit Risk Concentration per industry Sector

The Bank has diversified portfolio which encompasses various industries:

	December 31,		December 31,	
-	2013	<u>In %</u>	2012	In %
Construction industry	6.732	6%	3,553	4%
Trade	21,339	19%	19,462	23%
Services, tourism, catering and	,		,	_*
accommodation industry	1,801	2%	1,674	2%
Agriculture	5.747	5%	4,388	5%
Mining and industry	11,874	11%	9,017	11%
Transport, storage, postal services				
and telecommunications	7,387	7%	5,331	6%
Finance services	3.727	3%	4,726	6%
Real estate trade	744	1%	491	1%
Administration, other public services	1,561	1%	2.926	3%
Other (retail customers)	51,303	46%	34,040	40%
Total _	112,215	100%	85,608	100%

As of December 31, 2013 as compared to December 31, 2012, credit risk concentration decreased by 4% in the trade sector and increased by 6% in the retail sector, which includes private individuals and entrepreneurs, while the other industries mostly retained the same levels of concentration.

# Credit Risk Concentration per Loan Type

The Bank regularly monitors and diversifies placed loans according to their purpose.

	December 31,	I 0/	December 31,	l., 06
	2013	In %	2012	In %
Loans per transaction accounts	8,242	7%	5,293	6%
Consumer loans	32,931	29%	24,337	28%
Working capital loans	14,206	13%	15,960	19%
Investment loans	44,940	40%	34,939	41%
Housing leans	5,416	5%	1,986	2%
Other toans-purchased short-term	•		•	
Investments-factoring	6,480	6%	3,113	4%
Total	112,215	100%	85,608	100%

As of December 31, 2013 as compared to December 31, 2012, credit risk concentration decreased by 6% in working capital loans and increased by 3% in housing loans, while the other loans types mostly retained the same levels of concentration.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

### 29.2. Credit Risk (Continued)

## 29.2.1. Concentration Risk (Continued)

# Loan and Off-Balance Sheet Item Quality According to BARS Categories (Portfolio Quality)

Pursuant to the BARS Decision, the Bank classifies loans to customers according to the number of days they are in default (days past due).

Category						
December 31, 2013	A	В	C	D	E	To <u>tal</u>
Loans to customers - short-term	15.367	4.766	155	1	1	20,290
- long-term	71,313	13,167	2,422	332	61	87,295
- matured	538	1,135	347	1,248	1,253	4,521
- guarantees called on			109	<del>-</del>		109
Total loans	87,218	19,068	3,033	1,581	1,315	112,215
<ul> <li>off-balance sheet items</li> </ul>	9,757	217	2	-		9,97 <u>6</u>
Total	96,975	19,285	3,035	1,581	1 <u>,315</u>	122,191

#### 29.2.2. Stress Test

In the course of credit risk assessment, the Bank applied the worst possible scenario of events for its portfolio. The Bank performed the stress test under the following assumptions: 30% BAM devaluation, 40% collateral devaluation, and increase in allowance for impairment for customers with recorded defaults in settling their matured liabilities.

Portfolio as at December 31, 2013	Total Exposure	Total Exposure Net of Daposits	Discounted Collateral Value	Allowance for Impairment	Amount of Shortfall Reserves	Total Deterioration
Before the test After the test	123,306 150,615	121,837 149,146	114,484 81,220	3,265 4,063	3,533 3,667	6,7 <b>98</b> 
Difference	27,309	27,309	(33,264)	798	134_	932

#### 29.3. Market Risk

The Bank assumes market risks which represent the risk that the fair value or future cash flows from financial instruments may oscillate due to changes in market values. Market risks occur in open positions exposed to risk based on maturities, interest rates, currencies and capital products exposed to general and special movements and changes related to the degree of market rate and price volatility (such as interest rates, credit margins, foreign exchange rates and prices of capital).

The market risk control system is implemented through the separation of the risk assuming function (Front Office) from the risk monitoring and management function and backup activities (Back Office).

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

# 29. FINANCIAL INSTRUMENTS (Continued)

# 29.3. Market Risk (Continued)

### 29.3.1. Foreign Exchange Risk

Foreign exchange risk represents the Bank's exposure to the possible adverse effects of the changes in exchange rates causing the Bank to incur losses in tocal currency, where the level of foreign exchange risk represents the function of the amount and duration of the Bank's exposure to the possible changes in exchange rates and depends on the amount of Bank's foreign debt, extent of the foreign currency exposure of the balance sheet assets and off-balance sheet items as well as the matching of the currency cash flows of the Bank.

The strategy of the Bank, applied in foreign exchange risk management, is based on the maintenance of foreign currency balance within the limits prescribed by the Law on Banks of the Republic of Srpska and Decision on the Minimum Standards for Currency Risk Management in Banks.

For the purpose of controlling and identifying foreign currency exposure, the Bank monitors daily balances and structure of foreign currency cash in the treasury, foreign currency assets and structure per currencies on the accounts with foreign banks, ensures the matching between the foreign currency position denominated in unstable currencies, includes in contracts currency clause for both balance sheet assets and liabilities and off-balance sheet items, in the form a symmetrical, i.e. two-directional currency clause, in order to protect the value of assets and liabilities irrespective of the rise or decline of the exchange rate of the currency the currency clause refers to against the local currency, so as to achieve currency match between the financial assets and financial liabilities.

The Treasury and Transactions Department monitors the foreign currency position on a daily basis and, in collaboration with the Front Office and Bank's Managing Board undertakes adequate aforesald activities in order to maintain the foreign currency position within the permitted limits. In planning activities that significantly influence the changes in the structure or maturities of the Bank's financial assets and/or financial liabilities, and thereby Bank's foreign currency position, the Treasury and Transactions Department makes projections of the foreign currency position in order to ensure timely activities for continuous maintenance of the currency match of financial assets and financial liabilities.

The breakdown of foreign currency balances as of December 31, 2013, net is presented in the table below:

	EUR	USD	CHF	GBP	Other	Total

(All amounts expressed in thousands of BAM, unless otherwise stated.)

### 29. FINANCIAL INSTRUMENTS (Continued)

#### 29.3. Market Risk (Continued)

#### 29.3.1. Foreign Exchange Risk (Continued)

During 2013, the bank maintained the open individual foreign currency position within limits permitted for EUR currency up to the maximum of +/- 30% of its core capital and for USD currency up to 3% of its core capital, while the total foreign currency position was within the permitted range, but up to the maximum of +/- 27% of the Bank's core capital.

Foreign Currency Sensitivity Analysis

The Bank is mostly exposed to EUR. Since Convertible Mark (BAM) is pegged to EUR, the Bank is not exposed to risk of fluctuations in the EUR exchange rate.

#### 29.3.2. Interest Rate Risk

The Bank is exposed to multiple risks, which influence its financial position and cash flows through the effects of changes in the amount of interest rate fluctuations on the market. Interest rate risk is the risk from adverse effect on the Bank's financial result and equity conlingent on the changes in interest rates.

The basic objective of interest rate risk management is to minimize adverse effects of changes in interest rates.

Fixed interest rates were applied to the loans with repayment periods of up to 36 months, and variable to the loans with repayment periods of over 36 months. The exceptions are loans approved to corporate customers and public sector customers as well as housing loans where the variable interest rates are applied for all repayment periods. The Sank decide on the variable interest rate equal to 6-month EURIBOR rounded to the next decade above adjusted two times a year, on June 30 and December 31.

Fixed interest rates are applied to deposits, and interest rates on foreign borrowings are variable and based on 6-month EURIBOR.

The basic principle of interest rate management is matching assets and liabilities per interest rate type (fixed or variable) and maturities or repricing dates.

The Bank's top management and Risk Management Department take care of optimization of the levels of profitability and interest rate risk exposure.

Interest Rate Sensitivity Analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for instruments at the statement of financial position date. For floating rate liabilities, the analysis is prepared assuming the amount of liability outstanding at the statement of financial position date remained the same for the whote year. A 10% increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

Had interest rates been 10% higher/lower and all other variables were held constant, the Bank's profit for the year ended December 31, 2013 would have decreased/increased by BAM 420 thousand (2012: profit decreased/increased by BAM 200 thousand).

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

#### 29.4. Liquidity Risk

Liquidity risk is the risk which emerges when the Bank is unable to settle all flabilities when due and in full. The basic objective of liquidity management is to ensure that the Bank has resources obtainable at reasonable costs necessary to discharge all liabilities for expected and unexpected fluctuations in the statement of financial position. Additionally, the process of liquidity management in the Bank needs to ensure liquid resources sufficient to finance the development of its loan portfolio.

The strategy of liquidity risk management in the Bank is implemented by establishing control over maturity matching between assets and sources of assets, based on realistic and accurate projections of cash inflows and outflows, regular and extraordinary, over different time periods.

The strategy of asset liquidity risk management encompasses:

- Strivings to keep within the line items of assets, liquid forms of assets easily exchanged on the
  market for cash at no loss in case of a liquidity crisis (the Bank's aim is to maintain sufficient
  available resources to discharge its contingent liabilities at any time);
- Diversification of investments per separate customers, per industries and per loan maturities.

The strategy of liability management in respect to liquidity comprises the following:

- Strivings to ensure deposit stability with increasing participation of long-term deposits.
- Maximum diversification of resources according to their maturity, stability, origin, market and instruments,
- Particular attention is paid to large deposits,
- Undertaking arrangements with domestic and foreign banks on mutual extension of interbank liquidity loans which makes it possible to invest liquidity surpluses at an adequate interest rate, i.e. in case of insufficient liquidity funds, these resources are available to the Bank at favorable terms.

Primary sources of funds are local deposits acquired by the Bank by applying adequate interest rate policy.

The adoption, comprehensiveness and implementation of the Liquidity Risk Management Program is the responsibility of Bank's Supervisory Board and its management.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

# 29. FINANCIAL INSTRUMENTS (Continued)

# 29.4. Liquidity Risk (Continued)

Everyday monitoring of dally liquidity in the Bank is the responsibility of the Treasury and Transactions Department and Liquidity Commission; short-term liquidity is the responsibility of the Liquidity Commission; and long-term liquidity is the responsibility of the ALCO (the Asset and Liability Management Committee).

Responsible persons monitor the liquidity position and composition of asset and liability maturities and:

perform operational management of liquid assets on daily basis,

compare the positions with projected position so as to determine trends in the liquidity positions and
undertake adjustment measures so the liquidity position and maturity gaps would be in compliance
with the law and the limits set by the Bank's Supervisory Board.

The table below shows a GAP analysis of assets and tiabilities according to respective maturity based on the outstanding period before the agreed due date by matching receivables and payables per maturity periods in accordance with BARS regulations.

## 29.5. Operational Risk

Operational risk management is an important part of the Bank's business as it minimizes adverse effects on the income and equity of the Bank. Operational risk management entails the following:

- Forming a network of operational risk custodians and reporters across departments and divisions, who are in charge of taking activities in the area of operational risk management;
- Maintaining records on harmful events occurrences;
- Operational risk identification and assessment within all processes and adoption of measures for risk minimization;
- Regular reporting on damages incurred and detailed review of risks identified per process;
- Monitoring of implementation of the proposed measures for the review of operational risks.

#### Operational risk is managed based on:

- Monitoring harmful events occurrence in the scope of operational risks;
- Risk Identification per process within the Bank;
- Significant risk measurements;
- Continuous monitoring and control of operational risks;
- Forming the minimum amount of adequate capital.

Monitoring harmful events occurrence in the scope of operational risks results in the historical review of the scale and type of actually occurred operational risks and is performed in accordance with the Procedure and Instructions for Harmful Event Recording.

Operational risk management is performed through the following activities:

- Identification of the existing sources of operational risks and sources contingent on the introduction of new products, systems and activities;
- Operational risk measurement through accurate and timely risk estimates;
- Continuous control of operational risks ensuring the maintenance thereof up to the level acceptable for the Bank's risk profile, its reduction and minimization;
- Continuous monitoring of operational risks by analyzing amounts, changes and trends of the Sank's exposure thereto;
- Forming the minimum amount of capital for protection against incurring operational risk-based losses (MACOR);

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

# 29. FINANCIAL INSTRUMENTS (Continued)

## 29.5. Operational Risk (Continued)

- Clear definition of authority and responsibility lines in the process of operational risk assumption and management;
- Setting up a system to ensure that all Bank's employees become familiar with their respective
  obligations in the process of operational risk management;
- Setting up a system for regular reporting to the Supervisory Board and Managing Board on functioning of the operational risk management;
- Obligatory regular periodical review and obligation of the Supervisory Board to analyze and assess adequacy of the established system for operational risk management at least annually.

# 29.6. Country Risk

The risk related to the counterparty country of origin means adverse effects on the Bank's financial performance and capital due to the Bank's Inability to collect receivables due from such counterparty resulting from political, economic and social circumstances in the counterparty country of origin.

The Bank manages country risk according to its risk management strategy and policy.

In assuming risk toward banks outside of Bosnia and Herzegovina, upon exposure limit approval, country risk assessment is also taken into account.

# 29.7. Capital Management

Capital represents a unique economic resource and capital management is one of the most important components of the Bank's prudent, efficient and strategic planning and management.

The Bank manages its capital with a view to:

- Ensure compliance with BARS requirements;
- Ensure adequate amount of capital for continuation of business operations; and
- Maintain its capital at the level that will enable future development.

The Bank's capital management policy includes providing and maintaining the quantity and quality of the capital at least at the level of the minimum standards prescribed by the BARS Decision on the Minimum Standards for Capital Management of Banks (the "Decision"), i.e., the minimum amount of the share capital and the minimum amount of the net capital that the Bank is under obligation to maintain cannot be below BAM 15 million. In accordance with the aforecited decision, the Bank's capital is comprised of the core capital (Tier 1), supplementary capital (Tier 2) and additional capital (Tier 3) and net capital is the capital less deductible items.

The Bank's core capital is comprised of share capital paid in cash and other reserves that do not refer to the asset quality assessment less the following deductible items: unabsorbed prior years' losses and intangible assets. The Bank's supplementary capital includes general reserves for absorption of credit losses per Bank's assets within category A – good assets, amount of calculated current year profit audited and confirmed by an external auditor, and subordinated debts up to the maximum of 50% of the core capital. The deductible item is the amount of shortfall reserves for credit losses per regulatory regularement (which the Bank did not form).

The Bank's policies for maintaining the quantity and quality of the capita include the following:

- In respect of the shareholder composition and profile, the Bank is focused on shareholders from the banking sector and areas of micro crediting, financial investment, corporate shareholders and eventually private individuals;
- Policy of diverse equity instruments, particularly within the core and supplementary capital, and decrease or avoidance of the capital deductibles;
- In respect of the profit distribution, increase in the Bank's total capital in accordance with the
  effective regulations;
- In respect of the capital adequacy, when the capital adequacy ratio fall below 15%, the 8ank
  undertakes activities to improve capital adequacy by new share issues, increase of
  supplementary capital by setting as priorities restructuring of bad assets, write-off of liabilities
  and obtaining subordinated debts.

Year Ended December 31, 2013

(All amounts expressed in thousands of BAM, unless otherwise stated.)

# 29. F/NANCIAL INSTRUMENTS (Continued)

# 29.7. Capital Management (Continued)

Procedures for continuous monitoring of the balances are implemented through:

- Maintaining up-to-date accounting records;
- Monitoring capital balances per quantity, quality and structure;
- Monitoring and analyzing balance sheet Items and off-balance sheet credit equivalents;
- Reporting on changes in capital and changes that could have material adverse effect on the capital adequacy;
- Proposing necessary measures to be taken in order to ensure the quantity and quality structure
  of capital; and
- Planning the capital in terms of anticipating the Bank's future needs and requirements for capital.

The plan for capital adequacy maintenance is harmonized with the plans for overall activities given the current condition and expected influences of the anticipated changes in the business operations and environment. The Bank is under obligation to maintain capital adequacy at the minimum of 12% and the management regularly monitors the adequacy indicators and submits a report thereon in the prescribed form to BARS on a quarterly basis.

As of December 31, 2013, the Bank was in full compliance with all the prescribed capital adequacy indicators:

	Year Ended December 31,		
	2013	2012	
Core capital	20,028	19,145	
Supplementary capital	6,169	2,069	
Deductible (tems	3,448	2,366
